SUMMARY

Product manager with a data-science foundation who ships software that fits how customers think and automates the work they don't have time for. Nine years from zero-to-one founder to data scientist to PM across fintech and vertical SaaS—customer-embedded, credible with engineers, fluent in the data. **Outcomes: \$50M+ migrated across institutions; vacancies filling 3–5 days faster, submissions nearly doubled.**

Focus — agentic AI products · eval systems · data pipelines & integrations · customer-embedded delivery · SQL/Python

EXPERIENCE

AppFolio — Product Manager · Rental Applications

Jan 2023 – Present

- Led the end-to-end rebuild and launch of the rental application; **vacancies now fill 3–5 days faster and submissions nearly doubled.**
- Shipped reporting and direct integrations into AppFolio's proprietary **AI stack**, giving property managers first-time visibility into their lead funnel.
- Ship agentic features with a **JTBD** → **OOUX** → **Spec Kit** method: object models define the agent's tools, and a behavioral spec plus **evals** gate each release.

Lively — Product Manager ← Data Scientist

Nov 2019 – Dec 2022

Promoted to Product Manager in 2021 · HSA fintech, SF Bay Area

- Built partner **APIs and migration pipelines** that ingested, validated, and reconciled **\$50M+ in assets** across financial institutions with zero data loss.
- Authored the data model and integration patterns partners used to evaluate and onboard a compliant HSA offering—no infrastructure build of their own.
- Stood up the company's first **data-science** function, then grew the work into product management as the company scaled.

Oracle — Data Scientist, Applied Research

Sep 2017 – Sep 2019

- Built an automated **model-evaluation system**—hundreds of tests per model update—to gate changes on statistical significance, not gut feel.
- Modeled large-scale consumer signals (location, behavioral, real-world) to predict purchasing behavior.

Seifer, LLC — Founder

2016

- Solo-founded a men's athletic eCommerce brand: developed a carbon-neutral performance fabric, built a 20-month P&L model, and led design through launch.

SKILLS

PRODUCT

Agentic AI product · JTBD discovery · object modeling (OOUX) · eval design · roadmaps · funnel & conversion · experimentation

DOMAINS

AI-native & vertical SaaS · fintech (financial data, HSAs) · data platforms · applied ML

TECHNICAL

SQL · Python · APIs & system integration · data modeling · ETL / migration pipelines · LLM & agent systems (RAG, tool use, evals)

STRENGTHS

Customer-embedded delivery · zero-to-one shipping · technically credible with engineering

EDUCATION & SELECTED WORK

B.A., Communication Studies — Westmont College · 2010–2014 | **Data Science Immersive (ML)** — Galvanize · 2017

Builds & ships free public tools at bensiverly.com (Native Plant Finder, Decision Assist, +3) — working samples from problem to shipped software.
